

## CALL FOR PAPERS

**Abstract Deadline – October 15, 2009**

### 5th FORUM ON NEW MATERIALS

Montecatini Terme, Italy, June 13-18, 2010

*6th International Conference*

### **Science and Engineering of Novel Superconductors**

This conference, which follows those on the same subject held as from 1990 in the frames of CIMTEC, will highlight recent progress in the fundamental research and technological issues of superconductor materials. Following the mission of the previous conferences emphasis will be on novel aspects, issues and systems, including the recently discovered materials, such as Fe-based pnictides, but attention will be paid as well to all relevant superconducting-related topics, including fundamental aspects of theory, advances in synthesis, functionalisation and processing, and the latest progress in devices at small scale and large scale ranges. Original contributions are welcome concerning the above and related subjects.
