

## Inaugural European Cryogenics Day Held

June 23, 2014 (HE87). The inaugural European Cryogenics Day was held on May 29, 2014 at the Rutherford Appleton Laboratory (RAL), Oxfordshire, UK. It was conceived as both a conference and networking event and was very successful with 110 attendees from 12 countries who attended 84 brokerage meetings. It was organized under aegis of the Science and Technology Facilities Council (STFC), Enterprise Europe Network South-East UK, The British Cryogenics Council, The European Space Agency and the International Cryogenics Engineering Conference Council (ICEC).

The next European Cryogenics Day will be held in 2015 in Grenoble France. The cryogenics day is intended for both

- **researchers** working in cryogenics and
- **industry representatives** who benefit from this enabling technology's many applications, including superconductivity.

All the details available on the past and planned events can be found at the <http://www.b2match.eu/cryoineurope>.
