

The IEEE Spectrum Magazine on the C3 Project

March 24, 2016 (HP107). The IEEE Spectrum Magazine published recently a popular article on superconducting computing by [David C. Brock](#), who recently became director of the Center for Software History at the [Computer History Museum](#). The description of the ongoing [IARPA C3 program](#) on energy efficient computing is preceded by a historical overview of various superconducting computing concepts and R&D programs over the past six decades. The URL of that article is:

<http://spectrum.ieee.org/computing/hardware/will-the-nsa-finally-build-its-superconducting-spy-computer> .
