

Plenary ASC 2016 Presentation on Voltage Metrology Now Available in Annotated Version

March 15, 2017 (HP122). The SNF Issue No. 38 includes eight slide shows of plenary presentations at the ASC 2016. These slide shows were published without any explanatory notes and even otherwise required abstracts, because at that time the plenary ASC authors weren't ready to prepare and submit these. We felt that it is more useful to our readers to have at least an approximate idea on plenary talks given rather than none.

Recently, Sam Benz, Head of the Superconductive Electronics Group at the National Institute of Standards and Technology (NIST), Boulder, CO, USA, expended a considerable effort to thoroughly annotate his presentation. The resulting publication is largely equivalent to an excellent tutorial paper on principles of quantum voltage standards and their current status at NIST. Consequently, we wish to alert interested readers to this document now accessible in SNF [Issue 38, ref. No. RP76](#).
