

European Conference on Applied Superconductivity 2013

October 18, 2013 (HE80). The European Conference on Applied Superconductivity 2013 (EUCAS 2013) was held in Genoa (Italian Genova), Italy, from September 15 to 19, 2013. The conference was very successful in attracting over 1000 participants (including exhibitors) and was exceedingly well organized. The program with four parallel sessions cannot be summarized here, but we make accessible the complete [Conference program booklet](#) (including abstracts). It is worthy of noting that the plenary and invited part of this program emphasized various facets of materials and materials physics, and to somewhat lesser extent large scale applications of superconductivity.

At the end of the Conference, after the winners of EUCAS awards for the best young researcher presentations were named and award certificate presented to the awardees, the Conference Chairs, Prof. Marina Putti and Dr. Carlo Ferdeghini offered their concluding remarks illustrated by a slide show (presented by Prof. Putti), which can be viewed [here](#). It highlights the ESAS awards, offers the complete Conference attendance statistics, characterizes the satellite ESAS Summer School on “New Trends in Superconducting Quantum Detectors”, and lists EUCAS 2013 supporters, organizers and committees. The remarks concluded by acknowledging members of the whole Conference team that helped making the Conference run so smoothly and successfully. The last slide publicizes the next Conference, EUCAS 2015, which will be held in Lyon, France, from September 6th to 10th, 2013, see www.eucas2015.org. This meeting will be chaired by Prof. Pascal Tixador of CNRS and INP Grenoble.

Below we include several snapshots from the Conference, which complement the slide show.

Photo 1. First plenary presentation by A. Devred.

Photo 2. Audience at the 1st plenary session.

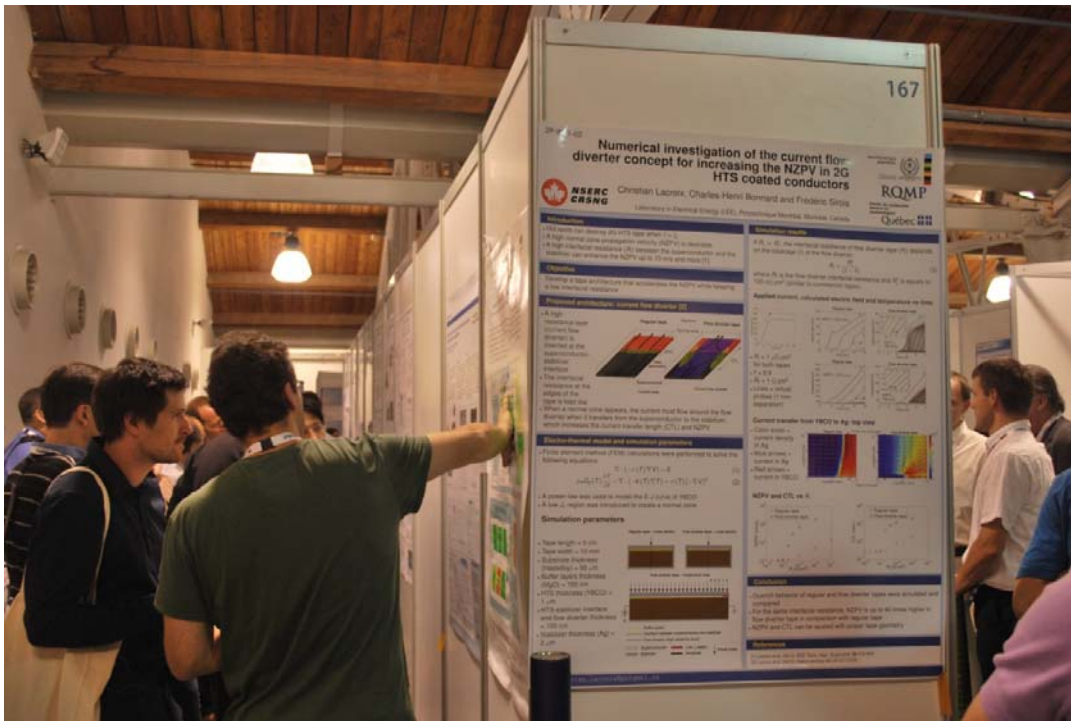

Photo 3. Snapshot of a crowded poster session.

Photo 4. Conference Chairs with the Nobel Laureate, Prof. Alex Müller.

Photo 5. Conference dinner on the patio of the Aquarium of Genoa in the “Porto Antico” (Old Harbor), September 17, 2013.
