

Editor's Comment on Paper CR16

February 24, 2010 (CR16-D1). The paper CR16 "Superconductivity: Its Role, Its Success and Its Setback in the Large Hadron Collider (LHC) of CERN" by Lucio Rossi was published yesterday by SuST (*Supercond. Sci. Technol.*) 23, No. 3, 2010, 034001, and was immediately commented on by online "*Nature*" vol. 63, 1008-1009 (2010), in a news item entitled "Did design flaws doom the LHC?". The author's straightforward analysis of the major accident, which set back the scientific schedule of LHC by much more than a year is summarized, and other opinions, including one of an external scientist presented. The actual text of the news item can be found at <http://www.nature.com/news/2010/100223/full/4631008a.html>
