

First Announcement

International Conference "Superconductivity for Energy 2014"

Savoy Beach Hotel, Paestum (SA), Italy
May 15-19, 2014

Detailed info are available on the conference website:
<http://s4e.fisica.unisa.it/index.html>

We are pleased to invite you to join the S4E 2014 Conference.

The event is organized within the "NAFASSY" (NATIONAL FACility for Superconducting SYSTEMS) project framework by the Physics Department of the University of Salerno in collaboration with the Italian National Research Council (CNR) and the Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA), and the Center for New Technologies (CRdC).

Location

The Savoy Beach Hotel is located in Paestum (SA) (<http://www.savoybeachhotel.it/>).

Paestum is a city of ancient foundation. It was born with the name of Poseidonia in the 6th century BC, built by the Achaeans, Greek colonists from Sibari who chose it as a maritime commercial centre. Paestum is nowadays at the same time one of the most important archeological sites in Italy and a well-known seaside resort, with its large beaches, surrounded by pine wood and rich of hotels and outdoor facilities. Since 1999 the ruins of the ancient Greek community of Paestum are one of the Unesco World Heritage Sites.

Main Topics

- High Power Applications of Superconductors: materials, cables and magnets
- Frontiers in High Field Magnet technology
- Superconductors for Energy
- Power Devices (Motors, SMES, FCL)
- High Current superconductivity
- Superconducting properties and functionalities for new applications

Important Dates

16/12/2013 - Abstract Submission and Registration Opening
01/03/2014 - Abstract Submission deadline for oral presentations
10/03/2014 - Abstract acceptance
15/03/2014 - Early registration deadline
30/04/2014 - Abstract Submission deadline for poster presentations
05/05/2014 - Late Registration deadline
(after this date only on-site registration will be allowed)

International Advisory Committee

Leonardo Civale

Los Alamos National Laboratory, USA

Carlo Ferdeghini

CNR-SPIN, Genova, Italy

René Flükiger

Université de Genève, Switzerland

Bartek A. Glowacki

University of Cambridge, UK

Bernhard Holzapfel

Leibniz Institute for Solid State and Materials Research Dresden, Germany

David Larbalestier

Applied Superconductivity Center, Florida, USA

Xavier Obradors

Institut de Ciència de Materials de Barcelona, Spain

Antonio Della Corte – NAFASSY Project

Italian National Agency for New Technologies, Energy and Sustainable Economic Development, Italy

Sandro Pace – NAFASSY Project

University of Salerno, Italy

Organizing Committee

Valentina Corato

ENEA, Italy

Filippo Giubileo

Cnr-SPIN Salerno, Italy

Gaia Grimaldi

Cnr-SPIN Salerno, Italy

Nadia Martucciello

Cnr-SPIN Salerno, Italy

Claudia Napoli

University of Salerno, Italy
